ENERGY POLICY

Index to Volume 28

January, February, March, April, May, June, July, August, September, October, November, December

Articles – Titles

Coal

Coal and plastic waste in a PF boiler *P E Campbell, S McCahey, B C Williams and M L Beekes* 28:4, 223–229

The governance of transactions: Joskow's coal-burning generating plants example revisited *E Loredo and E Suárez* 28:2, 107–114

How costly is the maintenance of the coal-mining jobs in Europe? The Spanish case 1989–1995 *I R Fernández* 28:8 537–547

Electricity

Carbon abatement and new investment in liberalised electricity markets: a nuclear revival in the UK? *J Peña-Torres and P J G Pearson* 28:2, 115–135

The development of a green certificate market *P E Morthorst* 28:15 1085–1094

The economic viability of commercial wind plants in Greece, A complete sensitivity analysis *J K Kaldellis and Th J Gavras* 28:8, 509–517

Electric-drive vehicles for peak power in Japan *W Kempton and T Kubo* 28:1, 9–18

Electricity use and economic development *R Ferguson, W Wilkinson and R Hill* 28:13, 923–934

Estonian energy system, Proposals for the implementation of a cogeneration strategy *H Lund, F Hvelplund, K Ingermann and Ü Kask* 28:10, 729–736

An evaluation method for calculating the emission responsibility of specific electric applications *K R Voorspools and W D D'haeseleer* 28:13, 967–980

The governance of transactions: Joskow's coal-burning generating plants example revisited *E Loredo and E Suárez* 28:2, 107–114

Long-term electricity demand in China—from quantitative to qualitative growth *C von Hirschhausen and M Andres* 28:4, 231–241

A perspective on the restructuring of the Finnish electricity market *P-O Pineau and R P Hämäläinen* 28:3, 181–192

Photovoltaics: technology overview *M A Green* 28:14, 989–998

Power sector reform in Orissa: an ex-post analysis of the causal factors *A T Rajan* 28:10, 657–669

Power trade and competition in Northern Europe *B Tennbakk* 28:12, 857–866

Reform of China's electric power industry, Challenges facing the government *P Andrews-Speed and S Dow* 28:5, 335–347

Understanding technology choice in electricity industries: a comparative study of France and Denmark *C Hadjilambrinos* 28:15, 1111–1126

The way to restructure the Lebanese electric power sector: a challenge for the transitional management *G Badelt and M Yehia* 28:1, 39–47

Energy conservation and efficiency

Dealing with environmental savings in a dynamical economy — how to stop chasing your tail in the pursuit of sustainability *C Sanne* 28:6–7, 487–495

Defining the rebound effect *P H G Berkhout, J C Muskens and J W Velthuijsen* 28:6–7, 425–432

Does the predicted rebound depend on distinguishing between energy and energy services *H D Saunders* 28:6–7, 497–500

Domestic energy efficiency in Ireland: correcting market failure *J P Glinch and J D Healy* 28:1, 1–8

The economics of energy efficiency: insights from voluntary participation programs *R B Howarth, B M Haddad and B Paton* 28:6–7, 477–486

Energy efficiency: rebounding to a sound analytical perspective *J A Laitner* 28:6–7, 471–475

Energy efficiency in buildings through information — Swedish perspective *J Henryson, T Häkansson and J Pyrko* 28:3, 169–180

Energy efficiency and consumption — the rebound effect — a survey *L A Greening, D L Greene and C Difiglio* 28:6–7, 389–401

Energy efficiency fallacies revisited *L Brookes* 28:6–7, 355–366

Estimating future elasticities of substitution for the rebound debate *M Jaccard and C Bataille* 28:6–7, 451–455

Estimating the linkage between energy efficiency and productivity *G A Boyd and J X Pang* 28:5, 289–296

A holistic approach to compare energy efficiencies of different transport modes *R Ramanathan* 28:11, 743–747

Impact of social costing on the competitiveness of renewable energies: the case of Crete *S Mirasgedis, D Diakoulaki, L Papagiannakis and A Zervos* 28:1, 65–73

Industrial energy efficiency decision making *B Tonn and M Martin* 28:12, 831–843

Integrated planning for mitigating CO_2 emissions in Taiwan: a multi-objective programming approach *G J Y Hsu and Feng-Ying Chou* 28:8, 519–523

Investment in energy efficiency: a survey of Australian firms *J Harris, J Anderson and W Shafron* 28:12, 867–876

Making cold homes warmer: the effect of energy efficiency improvements in low-income houses *G Milne and B Boardman* 28:6–7, 411–424

On the rebound? Feedback between energy intensities and energy uses in IEA countries *L Schipper and M Grubb* 28:6–7, 367–388

Prices, technology development and the rebound effect *F Birol and J H Keppler* 28:6–7, 457–469

The rebound effect: some empirical evidence from India *J Roy* 28:6–7, 433–438

The rebound effect for space heating, Empirical evidence from Austria *R Haas and P Biermayr* 28:6–7, 403–410

Savings estimates for the ENERGY STAR® voluntary labeling program *C A Webber, R E Brown and J G Koomey* 28:15, 1137–1149

Solar Olympic village case study *E D Spooner, D Morphett, M E Watt, G Grunwald and P Zacharias* 28:14, 1059–1068

The state significance of energy saving in buildings and principles of support programs in Lithuania *V Klevas and F Zinevicius* 28:11, 791–798

A view from the macro side: rebound, backfire, and Khazzoom-Brookes *H D Saunders* 28:6–7, 439–449

Energy consumption and efficiency

Incorporating sustainable development considerations into energy sector decision-making: Malmö Flintränen district heating facility case study *P Bardouille and J Koubsky* 28:10, 689–711

Long-term trends in direct and indirect household energy intensities: a factor in dematerialisation? *K Vringer and K Blok* 28:10, 713–727
What goes up: recent trends in China's energy consumption *J E Sinton and D G Fridley* 28:10, 671–687

Energy and the environment

An analysis of alternative fuel credit provisions of US automotive fuel economy standards *J Rubin and P Leiby* 28:9, 589–601
Comparison of methodologies for externality assessment *L Schleisner* 28:15, 1127–1136
Conflicting energy, environment, economy policies in Mexico *M Bauer and J Quintanilla* 28:5, 321–326
End-of-life management and recycling of PV modules *V M Fthenakis* 28:14, 1051–1058
Energy management and environmental awareness in China's enterprises *Chen Zhicheng and R Porter* 28:1, 49–63
Energy system assessment with sustainability indicators *N H Afgan, M G Carvalho and N V Hovanov* 28:9, 603–612
Greenhouse gas balances in building construction: wood versus concrete from life-cycle and forest land-use perspectives *P Börjesson and L Gustavsson* 28:9, 575–588
Identifying the individual components of United Kingdom domestic sector carbon emission changes between 1990 and 2000 *L D Shorrock* 28:3, 193–200
Impacts of market-based climate change policies on the US pulp and paper industry *M Ruth, B Davidsdottir and S Laitner* 28:4, 259–270
The Kyoto Protocol and developing countries *M Babiker, J M Reilly and H D Jacoby* 28:8, 525–536

Energy modelling

Modeling uncertainty of induced technological change *A Gritsevskyi and N Nakićenović* 28:13, 907–921
Modelling lifestyle effects on energy demand and related emissions *C Weber and A Perrels* 28:8, 549–566
Project-based greenhouse-gas accounting: guiding principles with a focus on baselines and additionality *L Gustavsson, T Karjalainen, G Marland, I Savolainen, B Schlamadinger and M Apps* 28:13, 935–946
Renewable energy in India — a modelling study for 2020–2021 *L Suganthi and A Williams* 28:15, 1095–1109

Energy policy and analysis

Annex I commitments: adverse economic impacts on developing countries: myth or reality? *M K Pathak, S Gupta and P Bhandari* 28:9, 641–649
Carbon abatement and new investment in liberalised electricity markets: a nuclear revival in the UK? *J Peña-Torres and P J G Pearson* 28:2, 115–135
Cooling down hot air: a global CGE analysis of post-Kyoto carbon abatement strategies *C Böhringer* 28:11, 779–789
Defining the rebound effect *P H G Berkhout, J C Muskens and J W Velthuijsen* 28:6–7, 425–432
Does the predicted rebound depend on distinguishing between energy and energy services *H D Saunders* 28:6–7, 497–500
Economic convergence and climate policy *J C Ciscar and A Soria* 28:11, 749–761
The economics of the greenhouse effect: evaluating the climate change impact due to the transport sector in Italy *M Mazzarino* 28:13, 957–966
Electricity use and economic development *R Ferguson, W Wilkinson and R Hill* 28:13, 923–934
Energy efficiency: rebounding to a sound analytical perspective *J A Laitner* 28:6–7, 471–475
Energy system assessment with sustainability indicators *N H Afgan, M G Carvalho and N V Hovanov* 28:9, 603–612
Estimating future elasticities of substitution for the rebound debate *M Jaccard and C Bataille* 28:6–7, 451–455
Estimating the linkage between energy efficiency and productivity *G A Boyd and J X Pang* 28:5, 289–296
The evolution of economic and environmental cost for crystalline silicon photovoltaics *M Oliver and T Jackson* 28:14, 1011–1021
A holistic approach to compare energy efficiencies of different transport modes *R Ramanathan* 28:11, 743–747
How could emissions trading benefit developing countries *C Philibert* 28:13, 947–956
Identifying the individual components of United Kingdom domestic sector carbon emission changes between 1990 and 2000 *L D Shorrock* 28:3, 193–200
Impact of social costing on the competitiveness of renewable energies: the case of Crete *S Mirasgedis, D Diakoulaki, L Papagiannakis and A Zervos* 28:1, 65–73
Implementing the Kyoto protocol: why JI and CDM show more promise than international emissions trading *E Woerdman* 28:1, 29–38
Improving firm performance in out-of-equilibrium, deregulated markets using feedback simulation models *S Gary and E R Larsen* 28:12, 845–855
Incorporating sustainable development considerations into energy sector decision-making: Malmö Flintränen district heating facility case study *P Bardouille and J Koubsky* 28:10, 689–711
Industrial energy efficiency decision making *B Tonn and M Martin* 28:12, 831–843
Investing in photovoltaics: risk, accounting and the value of new technology *S Awerbuch* 28:14, 1023–1035
Learning to lend for off-grid solar power: policy lessons from World Bank loans to India, Indonesia and Sri Lanka *D Miller and C Hope* 28:2, 87–105
Monitoring and assessing technology choice: the case of solar cells *B A Andersson and S Jacobsson* 28:14, 1037–1049
Natural gas imports into South Asia: a study in international relations *A Sen* 28:11, 763–770
Organizing emissions trading: the barrier of domestic permit allocation *E Woerdman* 28:9, 613–623
Prices, technology development and the rebound effect *F Birol and J H Keppler* 28:6–7, 457–469
Project-based greenhouse-gas accounting: guiding principles with a focus on baselines and additionality *L Gustavsson, T Karjalainen, G Marland, I Savolainen, B Schlamadinger and M Apps* 28:13, 935–946
The (pseudo-)liberalisation of Russia's power sector: the hidden rationality of transformation *P Opitz* 28:3, 147–155
The rebound effect: some empirical evidence from India *J Roy* 28:6–7, 433–438
Savings estimates for the ENERGY STAR® voluntary labeling program *C A Webber, R E Brown and J G Koomey* 28:15, 1137–1149
Structural changes in Europe's gas markets: three scenarios for the development of the European gas market to 2020 *A Ellis, E Bowitz and K Roland* 28:5, 297–309
A theory-based approach to market transformation *C Blumstein, S Goldstone and L Lutzenhiser* 28:2, 137–144
Understanding carbon lock-in *G C Unruh* 28:12, 817–830
Understanding technology choice in electricity industries: a comparative study of France and Denmark *C Hadjilambrinos* 28:15, 1111–1126
The viability of solar photovoltaics *T Jackson and M Oliver* 28:14, 983–988
A view from the macro side: rebound, backfire, and Khazzoom-Brookes *H D Saunders* 28:6–7, 439–449

Energy supply and demand

An analysis of sectoral energy intensity in India *P Tiwari* 28:11, 771–778
Converging to a common pattern of energy use in developing and industrialized countries *O Mielnik and J Goldemberg* 28:8, 503–508
Energy consumption for space heating of West-German households: empirical evidence, scenario projections and policy implications *A Schuler, C Weber and U Fahl* 28:12, 877–894
An evaluation method for calculating the emission responsibility of specific electric applications *K R Voorspools and W D D'haeseleer* 28:13, 967–980

Idiosyncrasies in Australian petrol price behaviour: evidence of seasonalities *J D Mitchell, Li Lian Ong and H Y Izan* 28:4, 243–259
Local policies for DSM: the UK's home energy conservation act *E Jones, M Leach and J Wade* 28:3, 201–212
Long-term trends in direct and indirect household energy intensities: a factor in dematerialisation? *K Vringer and K Blok* 28:10, 713–727
Modelling lifestyle effects on energy demand and related emissions *C Weber and A Perrels* 28:8, 549–566
On the rebound? Feedback between energy intensities and energy uses in IEA countries *L Schipper and M Grubb* 28:6–7, 367–388
What goes up: recent trends in China's energy consumption *J E Sinton and D G Fridley* 28:10, 671–687

Energy technology
Coal and plastic waste in a PF boiler *P E Campbell, S McCahey, B C Williams and M L Beekes* 28:4, 223–229
The diffusion of renewable energy technology: an analytical framework and key issues for research *S Jacobsson and A Johnson* 28:9, 625–640
End-of-life management and recycling of PV modules *V M Fthenakis* 28:14, 1051–1058
Energy viability of photovoltaic systems *E A Alsema and E Nieuwlaar* 28:14, 999–1010
The evolution of economic and environmental cost for crystalline silicon photovoltaics *M Oliver and T Jackson* 28:14, 1011–1021
Greenhouse gas balances in building construction: wood versus concrete from life-cycle and forest land-use perspectives *P Börjesson and L Gustavsson* 28:9, 575–588
Investing in photovoltaics: risk, accounting and the value of new technology *S Awerbuch* 28:14, 1023–1035
Making cold homes warmer: the effect of energy efficiency improvements in low-income houses *G Milne and B Boardman* 28:6–7, 411–424
Modeling uncertainty of induced technological change *A Gritsevskyi and N Nakićenović* 28:13, 907–921
Monitoring and assessing technology choice: the case of solar cells *B A Andersson and S Jacobsson* 28:14, 1037–1049
Photovoltaics: technology overview *M A Green* 28:14, 989–998
Photovoltaics in Zimbabwe: lessons from the GEF Solar project *Y Mulugetta, T Nhete and T Jackson* 28:14, 1069–1080
Prices, technology development and the rebound effect *F Birol and J H Keppler* 28:6–7, 457–469
The rebound effect for space heating, Empirical evidence from Austria *R Haas and P Biermayr* 28:6–7, 403–410
Solar Olympic village case study *E D Spooner, D Morphett, M E Watt, G Grunwald and P Zacharias* 28:14, 1059–1068
Understanding carbon lock-in *G C Unruh* 28:12, 817–830
The viability of solar photovoltaics *T Jackson and M Oliver* 28:14, 983–988

LDCs
An analysis of sectoral energy intensity in India *P Tiwari* 28:11, 771–778
Annex I commitments: adverse economic impacts on developing countries: myth or reality? *M K Pathak, S Gupta and P Bhandari* 28:9, 641–649
Converging to a common pattern of energy use in developing and industrialized countries *O Mielnik and J Goldemberg* 28:8, 503–508
How could emissions trading benefit developing countries *C Philibert* 28:13, 947–956
The Kyoto Protocol and developing countries *M Babiker, J M Reilly and H D Jacoby* 28:8, 525–536
Learning to lend for off-grid solar power: policy lessons from World Bank loans to India, Indonesia and Sri Lanka *D Miller and C Hope* 28:2, 87–105
Photovoltaics in Zimbabwe: lessons from the GEF Solar project *Y Mulugetta, T Nhete and T Jackson* 28:14, 1069–1080
Power sector reform in Orissa: an ex-post analysis of the causal factors *A T Rajan* 28:10, 657–669
The rebound effect: some empirical evidence from India *J Roy* 28:6–7, 433–438
Renewable energy in India — a modelling study for 2020–2021 *L Suganthi and A Williams* 28:15, 1095–1109
Wind energy development in Tamil Nadu and Andhra Pradesh, India Institutional dynamics and barriers *A Jagadeesh* 28:3, 157–168

National and regional energy profiles and government policy
An analysis of alternative fuel credit provisions of US automotive fuel economy standards *J Rubin and P Leiby* 28:9, 589–601
Conflicting energy, environment, economy policies in Mexico *M Bauer and J Quintanilla* 28:5, 321–326
Cooling down hot air: a global CGE analysis of post-Kyoto carbon abatement strategies *C Böhringer* 28:11, 779–789
Domestic energy efficiency in Ireland: correcting market failure *J P Glinch and J D Healy* 28:1, 1–8
The economics of energy efficiency: insights from voluntary participation programs *R B Howarth, B M Haddad and B Paton* 28:6–7, 477–486
The economics of greenhouse effect: evaluating the climate change impact due to the transport sector in Italy *M Mazzarino* 28:13, 957–966
Energy consumption for space heating of West-German households: empirical evidence, scenario projections and policy implications *A Schuler, C Weber and U Fahl* 28:12, 877–894
Estonian energy system, Proposals for the implementation of a cogeneration strategy *H Lund, F Hvelplund, K Ingermann and Ü Kask* 28:10, 729–736
Four decades of Groningen production and pricing policies and a view to the future *A F Correljé and P R Odell* 28:1, 19–38
The growth of Japan's LNG industry: lessons for China and Hong Kong *Pun-Lee Lam* 28:5, 327–333
How costly is the maintenance of the coal-mining jobs in Europe? The Spanish case 1989–1995 *I R Fernández* 28:8, 537–547
How sustainable is the framework for Norwegian gas sales? *K J Sunneväg* 28:5, 311–320
Idiosyncrasies in Australian petrol price behaviour: evidence of seasonalities *J D Mitchell, Li Lian Ong and H Y Izan* 28:4, 243–259
Impacts of market-based climate change policies on the US pulp and paper industry *M Ruth, B Davidsdottir and S Laitner* 28:4, 259–270
Improving firm performance in out-of-equilibrium, deregulated markets using feedback simulation models *S Gary and E R Larsen* 28:12, 845–855
Integrated planning for mitigating CO_2 emissions in Taiwan: a multi-objective programming approach *G J Y Hsu and Feng-Ying Chou* 28:8, 519–523
Investment in energy efficiency: a survey of Australian firms *J Harris, J Anderson and W Shafron* 28:12, 867–876
Local policies for DSM: the UK's home energy conservation act *E Jones, M Leach and J Wade* 28:3, 201–212
Power trade and competition in Northern Europe *B Tennbakk* 28:12, 857–866
Reform of China's electric power industry, Challenges facing the government *P Andrews-Speed and S Dow* 28:5, 335–347
The state significance of energy saving in buildings and principles of support programs in Lithuania *V Klevas and F Zinevicius* 28:11, 791–798
Understanding technology choice in electricity industries: a comparative study of France and Denmark *C Hadjilambrinos* 28:15, 1111–1126

Nuclear power
Carbon abatement and new investment in liberalised electricity markets: a nuclear revival in the UK? *J Peña-Torres and P J G Pearson* 28:2, 115–135

Oil and gas
Four decades of Groningen production and pricing policies and a view to the future *A F Correljé and P R Odell* 28:1, 19–27
The growth of Japan's LNG industry: lessons for China and Hong Kong *Pun-Lee Lam* 28:5, 327–333

How sustainable is the framework for Norwegian gas sales? *K J Sunnevåg* 28:5, 311–320
Natural gas imports into South Asia: a study in international relations *A Sen* 28:11, 763–770
OPEC and other commodity cartels: a comparison *A F Alhajji and D Huettner* 28:15, 1151–1164
Structural changes in Europe's gas markets: three scenarios for the development of the European gas market to 2020 *A Ellis, E Bowitz and K Roland* 28:5, 297–309

Renewables

Alternatives to coal and candles: wind power in China *D J Lew* 28:4, 271–286
The development of a green certificate market *P E Morthorst* 28:15, 1085–1094
The diffusion of renewable energy technology: an analytical framework and key issues for research *S Jacobsson and A Johnson* 28:9, 625–640
The economic viability of commercial wind plants in Greece, A complete sensitivity analysis *J K Kaldellis and Th J Gavras* 28:8, 509–517
Impact of social costing on the competitiveness of renewable energies: the case of Crete *S Mirasgedis, D Diakoulaki, L Papagiannakis and A Zervos* 28:1, 65–73
Learning to lend for off-grid solar power: policy lessons from World Bank loans to India, Indonesia and Sri Lanka *D Miller and C Hope* 28:2, 87–105
Renewable energy in India — a modelling study for 2020–2021 *L Suganthi and A Williams* 28:15, 1095–1109
Wind energy development in Tamil Nadu and Andhra Pradesh, India Institutional dynamics and barriers *A Jagadeesh* 28:3, 157–168
